## JAKO

**WE ARE TEAM** – this philosophy connects us with everyone who shares our values. It stands for solidarity, passion, and the desire to achieve more together. On this basis, we live longterm, value-based partnerships – with specialist retailers, our JAKO teams, and the JAKO Athlete Club.

Our athletes embody the team spirit both on and off the field. They wear our football boots on the big stage of sport, stand for genuine conviction, and are authentic ambassadors for our brand. With the JAKO Athlete Club, we are expanding our network to include strong personalities who are shaping the future of team sports together with us.

# JAKO

# PERFORMANCE

Every team member will find the perfect size with us. Our articles are available in unisex sizes as well as in children's and women's sizes. With classic cuts for men, tailored variants for women, and short, long, and plus sizes, we offer optimal fits for every body shape — for a uniform team spirit and maximum wearing comfort.

Every team has its colours — and we have the right selection. A wide range of colours with over 260 colour options and a well-thought-out colour concept enable a uniform appearance from head to toe. The high quality of our dyes ensures intense, bright tones and long-lasting colour fastness—even after numerous washes.

# PARTNER

We stand for availability. Our goal is to ship every order within 48 hours of receipt. This is possible thanks to our fully automated AutoStore® warehouse system, which guarantees maximum efficiency and speed. At least 95% of all articles are available at any time in our JAKO logistics center. Over 26.000 pallet spaces and one of the largest high rack warehouses in Europe ensure optimal supply of goods and guarantee that our products are available quickly and reliably at all times.

# PRODUCT

Through our wide network of specialist retailers, we guarantee personal support, qualified advice, and comprehensive on-site service. Together with our retail partners, we embody the team spirit and thus create closeness, trust, and reliability.

Clubs and teams will find the ideal contacts in their region at our specialist retailers — people who understand team sports, know their requirements, and share their passion.

OUR TEAMSPORT COLLECTION

**WITH CERTIFIED MATERIALS**

# THE KEY

Together with seven partners from research and industry, we are working on a recycling solution for textiles as part of the “TheKey” project. This pioneering project for the recyclability of the textile industry is funded by the Federal Ministry of Research, Technology, and Space (BMFTR). The aim is to completely recycle polyester/cotton blended fabrics through various key innovations in order to enable the sustainable use of these materials.

As part of the project, we launched an international collection campaign in 2025, in which over 1 000 sports clubs participated and sent in their old jerseys. The textiles were sorted and temporarily stored at our facility before being recycled and processed into new sports textiles in the next step. True to the motto: “Reuse, recycle, repeat.”

Discover more about sustainability at JAKO!

# RECYCLED POLYESTER

In the case of recycled polyester (rPET), existing material is processed and turned into new granulate. Compared to the production of polyester from primary raw materials (virgin PET), this process requires around 45-70 % less energy.

This range is based on several independent life cycle assessment studies and expert sources that compare the energy consumption of recycled PET or recycled polyester with new material. The actual savings vary depending on the recycling process, energy source, location, and underlying system boundaries.

The values quoted refer to the production stage of granulate manufacturing (“cradle-to-gate”) and do not include transport, further processing, or end-of-life phases.

Source: Textile Exchange (2023) – Materials Market Report 2023

# ORGANIC COTTON

**At JAKO, more than 80 % of cotton products are made from organic cotton.**

Organic cotton is grown without the use of chemical pesticides, synthetic fertilizers, or genetically modified seeds. The cultivation of organic cotton produces approximately 45 % less CO2 emissions than the cultivation of conventional cotton.

## CERTIFICATES

**FIFA®**

**BASIC**

Articles certified with the “FIFA Basic” certificate fulfill the fundamental criteria of performance, precision, safety and durability.

**FIFA®**

**QUALITY PRO**

The “FIFA Quality Pro” certificate promises maximum performance, accuracy and safety. This quality seal guarantees optimum performance at the highest level.

# BALLS

## SEAMS

**Hand-stitched balls:** The precise seams lead to a perfect form stability and maintain optimal ball pressure. The high-quality workmanship gives the ball a long life span and makes it particularly robust.

**Machine-stitched balls:** The increased number of stitching points ensures a particularly strong connection between the panels, which makes the ball extremely hard-wearing. The special construction also gives it the high-quality appearance of a hand-stitched ball.

**Bonding technology:** The seamless workmanship makes the ball particularly round and enables higher speed in games. The special glue reduces the water absorption, which significantly increases the life span and keeps the ball dimensionally stable even in wet conditions.

**Hybrid balls:** By combining stitching and gluing, hybrid balls combine the advantages of both technologies, giving them exceptional durability, stability and optimum playability.

## SURFACE/GRIP

The high quality, structured PU material of the ball offers optimum grip and leads to precise flight characteristics. In addition, the profiled surface improves aerodynamics and gives the ball a stable trajectory.

## LAYERS

The individual combination of various layers of foam lead to a soft, precise ball feeling and at the same time guarantees constant ball properties, even at low temperatures.

## BLADDER

**Butyl bladder:** The high density of the butyl bladder minimizes air loss, allowing the ball to keep its shape for a long time. If the bladder is also wrapped, it ensures perfect roundness and relieves the material which increases durability.

**Rubber bladder:** The rubber bladder offers significantly better air retention than the latex bladder. If the rubber bladder is also wrapped, it ensures perfect roundness of the ball. This helps to relieve the material and therefore contributes to a longer durability and higher playing quality.

PARTICULARLY

## FUNCTION

On the sports field, in the gym or on long working days: the functional properties of our textiles help you look good in every situation. Pay attention to the corresponding icons KEEP DRY and STOP WATER on the JAKO products.

## TEXTILE CARE

Textile friendly washing and drying is an essential part of textile care. In order to enjoy your textiles for a long time, you should pay attention to the care symbols on the label in the clothing. With tips and tricks from clevercare.info you will learn sustainable textile care.

## CUSTOMIZATION

Club badge, sponsor logos or player numbers: with a customization you can make your equipment unmistakable. That is why numerous JAKO team sport articles offer large free space for individual customization. Talk to your local sports retailer.

**NOTE:** When finishing with screen printing, we recommend the use of a migration blocker to achieve the best possible result.

Microfine fibres transport moisture directly to the surface of the fabric. Thus, the material dries very quickly, protects against cooling and keeps you a comfortable body feeling during sports.

Waterproof functional materials and welded main seams also provide reliable protection against moisture. The high water vapour permeability guarantees a comfortable body climate.
